The title header on the main screen will display the name of the profile you are currently viewing, or it will say "Growth Evaluation Tool" for the first time user or user not yet logged into a profile.
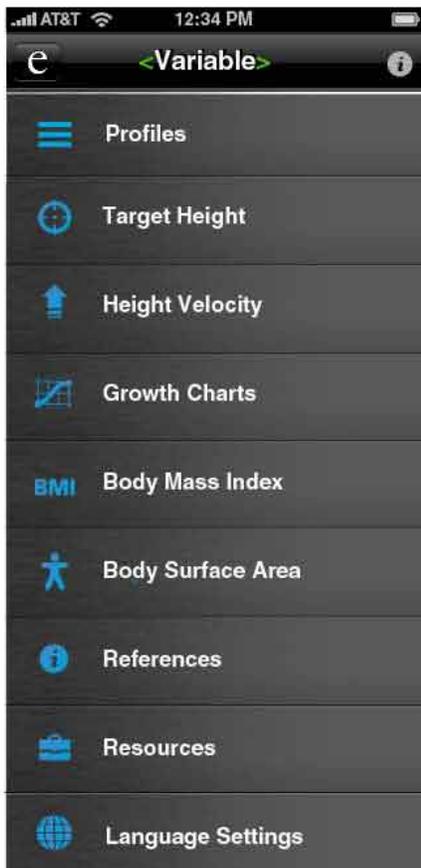

Two new sections have been added:

"Profiles" button will take you to the "Select or Create a Profile" page

"Language Settings" button will take you to the "Language Settings" page.

When a user leaves Sections 2-6 for the first time, and still hasn't created a profile, this alert message box will pop up over the content before they return to the main menu.

Create a Profile

No Thanks*

☑ Don't ask me again

* If you choose not to create a profile now, you can create one later by visting the main menu

View Important Safety Information

"Create a Profile" button will lead to the "Create a Profile" page.

"No Thanks" will allow the user to continue to the main menu.

Checking "Don't ask me again" will stop this alert message box from being triggered again for that session.

Create a Profile Page

When a user is creating a profile for the first time they will jump to this screen.

This screen is also used any-time a new profile is being created

If the profile name is already in use, this violator will appear

This is the screen the user will see when the "Profiles" tab is selected
